

Announcement: Calibration Connection Manifold
Part Number: CM xxxx
Subject: Manifold for Pressure Calibration

Description

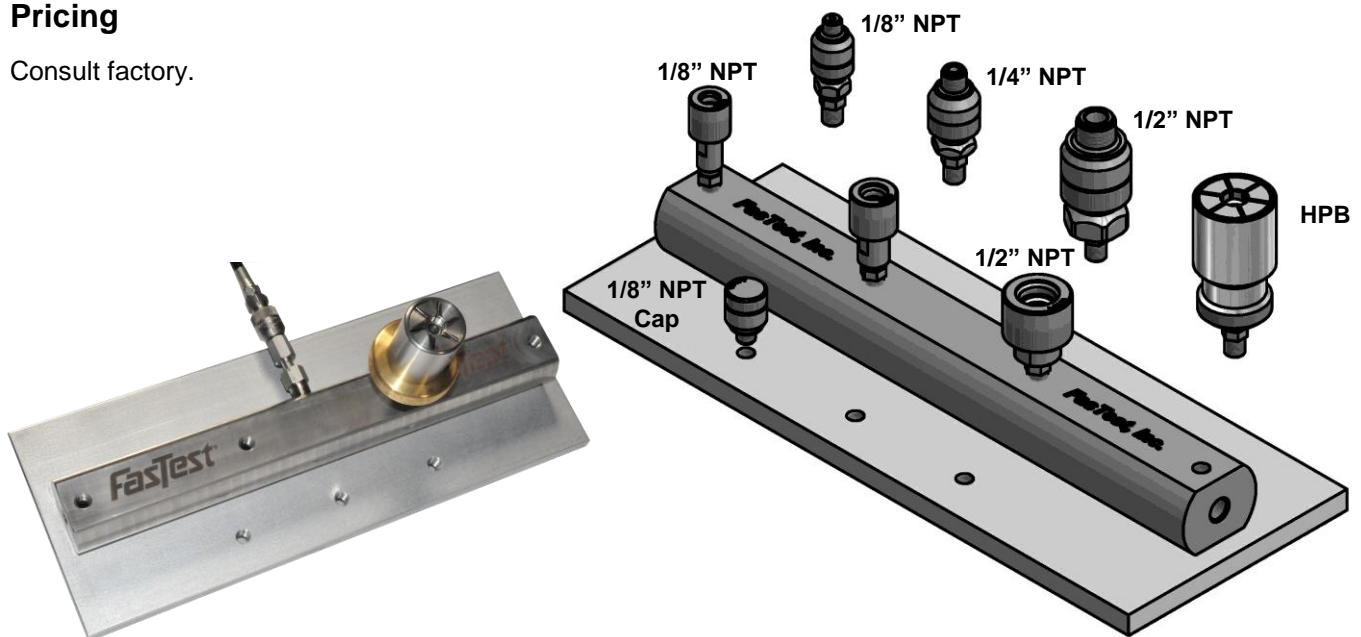

One of the challenges faced in a calibration lab is making leak tight connections to a wide variety of fitting configurations quickly. In some labs the number of connections per day require productivity tools be used to meet calibration demands. To meet these challenges and demands the **FasCal** Manifold System has been developed. Utilizing Stainless Steel construction this system allows any **FasCal** connector to be mounted on the manifold quickly and without the use of tape or wrenches. Changing from one **FasCal** connector to another can be accomplished in seconds. Optional accessories such as hoses, high pressure relief valves and hand valves are available to customize the solution for each lab.

Specifications

- Compact Stainless Steel construction – 15.5" x 6" x 2" (L x W x H)
- Manifold rated up to 5,000 PSI. Individual connectors will determine maximum overall system pressure rating.
- Hand valves available for port isolation and pressure venting.
- Compatible with **FasCal** connectors for both male and female applications.
- All **FasCal** connectors can be swapped out without the use of tape or wrenches.
- Additional manifolds can be daisy chained for high volume applications.
